Regarding planning reference 09/P/1020/0T2

I would like to ask for the conditions below are strengthened within the application prior to any descsion made at the planning meeting on the 3rd March 2010

the conditions to be considered are :-

"Condition 65 should be replaced with the following conditions

The passenger throughput shall not exceed 8 million passengers in any 12 month period until all related infrastructure improvements have been completed and until it can be shown that any further increase will not be in conflict with Government policies on aviation greenhouse gas emissions and overall reductions in greenhouse gas emissions.

The passenger throughput shall not exceed 10 million passengers in any 12 month period before December 31st 2019.

The average passengers per flight in any 12 month period shall not fall more than 10% below the levels of 2009.

Condition 38 should be replaced by

The total number of take-offs and landings between the hours of 23:30 hours and 0700 hours in the summer season shall not exceed 2400. The total numbers of take offs and landings between the hours of 23:30 hours and 07:00 hours in the winter season (as defined in condition 35) shall not exceed 800, so that the total night flights are no more than occured in 2008. All landings and takeoffs should be counted towards these totals."

Many Thanks

Mr S Penny

Winford
